INNOVAZIONE

INNOVATION

3D tech

La tecnologia 3D Tech consente di applicare differenti materie ceramiche, anche a spessore, in perfetta corrispondenza con la grafica sottostante, realizzata in digitale ad altissima definizione. Un processo produttivo rivoluzionario, che combina la matericità con l'estetica del prodotto, fino ad ottenere superfici dallo straordinario valore sensoriale.

The new 3D Tech technology allows thick layers of various ceramic materials to be applied in perfect alignment with the underlying graphic designs, which are created digitally with extremely high definition. This revolutionary production process combines material and aesthetic effects to create surfaces with extraordinary sensorial appeal.

SOFT 3D

La tecnologia SOFT3D consente di realizzare lastre dalla finitura extra morbida arricchite da effetti di bassorilievo che ne esaltano la naturalezza. La differente densità delle materie utilizzate in superficie, nelle zone selezionate, ricrea chimicamente le profondità, che si sovrappongono in maniera esatta alla grafica digitale ad alta risoluzione.

The SOFT3D technology allows to create slabs with an extra smooth finish, enriched with bas-relief effects that enhance the naturalness of the surface. The different density of the raw materials applied in the selected areas, chemically recreates the depths that exactly match the high-resolution digital graphic.

P. tech

La tecnologia P.TECH migliora la resistenza allo scivolamento, pur mantenendo una piacevole sensazione al tatto. P.TECH è il risultato di un innovativo processo produttivo che coniuga la selezione delle materie prime con le fasi di pressatura, cottura e lavorazione a fine linea. I prodotti P.TECH, pur raggiungendo i più elevati coefficienti di attrito, si puliscono facilmente, per questo possono essere utilizzati nei progetti wellness e outdoor, anche in aree pubbliche o commerciali.

The unique P.TECH technology improves slip resistance while maintaining a pleasant tactile sensation. P.TECH is the result of an innovative production process that combines a meticulous selection of raw materials with the pressing, firing and end-of-line processing stages. Despite their high coefficient of friction, P.TECH products are easy to clean, making them ideal not only for use on indoor floors but also in wellness and outdoor spaces in public or commercial areas.

POSA SOPRAELEVATA DA ESTERNO

Il sistema di pavimentazione sopraelevata prevede l'utilizzo di supporti portanti di tipo autolivellante, regolabili oppure fissi che si adattano con semplicità e sicurezza ad ogni tipo di pavimento sottostante.

Il sistema permette la realizzazione di piani di posa con altezze variabili, da terra, comprese fra 25 e 270 mm. L'indipendenza della pavimentazione dai supporti garantisce l'assorbimento di eventuali movimenti strutturali. Il sistema sopraelevato non necessita di massetto in cemento e consente una diminuzione del peso sulla struttura portante. Le fughe aperte tra una piastrella ed un'altra consentono un facile deflusso dell'acqua piovana evitando tutti i rischi di accumulo o di ristagno. La presenza dell'intercapedine fra il piano di calpestio e il piano di appoggio favorisce l'aerazione e l'isolamento termico. Questa soluzione permette inoltre il passaggio di impianti e tubazioni nell'intercapedine, e la facile ispezione degli stessi una volta installata la pavimentazione.

OUTDOOR RAISED LAYING SYSTEM

The raised floor system foresees the use of self-levelling, adjustable or fixed load bearing supports that easily adapt to the floor below in total safety.

The system is suitable to create laying designs with variable heights from the ground, which range between 25 and 270 mm. The independence of the flooring from the supports guarantees the absorption of any structural movements.

The raised system does not require a cement screed and reduces the load on the bearing structure. The open joints between the tiles allow rainwater to easily drain off, avoiding any risk of water accumulation or stagnation. The gap between the tread surface and the support surface favours ventilation and heat insulation. This solution allows for the installation of systems and piping in the gap, which can be easily inspected even once the floor has been installed.

LOGISTICA NUOVI SISTEMI DI IMBALLO LOGISTICS NEW PACKAGING SYSTEMS

L'innovazione della gamma GARDENIA SLABS si esprime anche attraverso la parte logistica del progetto. Gardenia rivoluziona il sistema di imballaggio delle lastre ed è a oggi l'unica azienda che ha portato il sistema a cavalletto impilabile alla dimensione di cm 75x284x147,5 (lastre 120x280), 75x168x109 (lastre 80x160) e 75x26x200 (lastre 26x200).

Questi i principali vantaggi offerti:

- essendo impilabile permette di ottimizzare gli spazi all'interno dei magazzini.*
- la profondità di 75 cm consente di sfruttare a pieno il volume di carico dei container (3 pallets ne occupano perfettamente la larghezza).
- il posizionamento verticale del prodotto garantisce una maggiore protezione delle lastre durante le fasi di trasporto.
- facilita le operazioni sul cantiere in quanto le lastre si trovano già posizionate in verticale, il materiale è facilmente ispezionabile e removibile per l'installazione.
- le dimensioni complessive del cavalletto consentono maggiori spazi di manovra all'interno dei locali di posa rispetto alle casse tradizionali e agevolano il sollevamento del materiale mediante mezzi meccanici (gru-montacarichi).
- è caratterizzato da un sistema di regettatura che consente di liberare anche 1 solo collo alla volta, senza compromettere la stabilità del materiale che rimane sul pallet, evitando così il rischio di rotture. Le lastre dovranno essere liberate rispettando la sequenza opposta rispetto a quella con cui sono state confezionate, quindi iniziando dall'ultimo collo regettato.

Innovation in the GARDENIA SLABS range is also reflected in the project's logistics. Gardenia has revolutionised the packaging of ceramic slabs and is the only company to have expanded the stacking rack pallet system to the 75x284x147,5 (slabs 120x280), 75x168x109 (slabs 80x160) and 75x26x200 (slabs 26x200) cm size.

This has the following advantages:

- stacking optimises the use of space in warehouses.*
- the 75 cm depth enables full use of container load space (3 pallets fit perfectly side by side). The vertical positioning of the product better protects the slabs during shipping.
- it facilitates work on site, since the slabs are already positioned vertically, making the material easy to inspect and remove for installation.
- the overall size of the rack pallet provides greater space for manoeuvring in the installation area in comparison with conventional crates, and also makes it easier to lift the slabs mechanically (with a crane or lift).
- the rack pallet system employs strapping which allows the user to remove a single package at a time without affecting the stability of the other packages on the pallet, thus minimising the risk of breakage. The slabs must be released from the packaging by reversing the packaging sequence, i.e. starting with the last package to have been strapped on.

Der Käufer verpflichtet sich, die beanstandeten Warenpartien für die Überprüfung der angezeigten Mängel zur Verfügung zu halten. Die Verlegung des Materials befreit uns in jedem Fall von jeglicher Haftung. CON QUESTO TERMINE SI VUOLE INDICARE IL GRADO (V1, V2, V3, V4) DI VARIAZIONE CROMATICA FRA PIASTRELLA E PIASTRELLA RACCHIUSO IN OGNI SCATOLA DI PRODOTTO MARCHIATO.

This symbol (V1, V2, V3, V4) classifies the chromatic shade variation among pieces of tile in one box of the collection.

Mit den Abkürzungen (V1, V2, V3, V4) will man den Farbabweichungsgrad unter den Fliesen jeden Kartons von der Kollektion weisen.
